### SHERBROOKE DESIGN & CONSTRUCTION

This circa-1940s Californian brick bungalow has been updated to provide the owners with more open living areas and indoor-outdoor entertaining. The new design includes the extension of the meals and family rooms onto an alfresco area complete with Merbau decking and bi-fold doors. The existing bedroom has been converted to a spacious laundry and a staircase to the upper-storey kids' zone, while a large walk-in pantry has been added to the kitchen. A bathroom update and new carport makes this makeover complete.
